SUMMARY

Self-taught full-stack developer with 3+ years of hands-on experience building production web applications across e-commerce, education, fintech, and marketplace domains. I have shipped five live products — including a multi-role school management platform, a luxury e-commerce site, and a real-time crypto trading desk used by my 500+ member community. Comfortable across the stack with React, Next.js, TypeScript, Tailwind, Node.js, and modern databases. I work concurrently as an IT Support Specialist across two oil & gas companies in Lagos, where I keep critical business systems running daily. I care about clarity, maintainable code, and shipping real outcomes.

FEATURED PROJECTS

The Thesis Desk — Crypto Trading Command Center · *Next.js · TypeScript · Tailwind · Real-time Data*

Full-stack trading platform built for the 500+ member crypto community I founded. Includes live price feeds for BTC, ETH, SOL, BNB, and XRP, P&L tracking, signal review, daily journaling with streak accountability, weekly discipline scoring, and a calculator suite. Features role-based admin access and a focused 'Today's Trade Plan' workflow.

EDUCATION

B.Sc. Educational Management

Oct 2019 — Aug 2024

University of Ilorin (UNILORIN), Kwara State, Nigeria

Note: I chose this degree at 18 before discovering software development. Over the last four years I have actively re-trained as a developer, shipping five production web applications and contributing 600+ commits to my own projects in the last year alone. My current portfolio reflects my real capability more accurately than my undergraduate transcript.
